

Ethnic/Asian Community's Voice On The Local Health Services

- What are your concerns with your and your family's health?
- Can you easily access your local GPs and hospitals?
- What kind of health services do you need for you and your family?
- What are your cultural needs in the health services?

The Asian Network Inc. (TANI) would like to invite the Asian families and community members, who are living/working in the Ōtara-Papatoetoe area, to participate in group discussions carried out in May 2023.

We will listen to your health needs that need to be included into the Ōtara-Papatoetoe locality plan, which is part of Pae Ora/Healthy Futures of New Zealand.

The health needs of Asian people are different from other ethnic groups. Therefore, your participation and having your say on the Ōtara-Papatoetoe locality health plan is important, in order to improve your and your family's health and prevent avoidable diseases.

To take part in a group discussion
