Guide
Auckland
Types of Flooding
Flood plains
Learn more
Areas predicted to be covered by flood water during heavy rain.
Flood prone areas
Learn more
Low-lying areas where water can become trapped and collect during heavy rain, especially if the stormwater outlet is blocked or reaches capacity.
Overland flow paths
Learn more
The route water will naturally take across the ground during heavy rain when the stormwater network is at capacity, or where there is no stormwater network.

Water Safety Code *(for Flood Waters)*

Drowning Prevention Auckland

IF IN DOUBT, STAY OUT

Know your limits. Stay well back from stormy seas, flooded rivers and drains.

FIND THE SAFEST PLACE TO SWIM

If possible, stay out of floodwaters. Never enter flooded waters for recreation.
After floods, be aware that conditions may have changed, and waterways may be contaminated with floating debris.

KNOW HOW TO FLOAT

If you do have to enter water; take flotation with you and watch out for obstacles. Consider appropriate personal flotation devices and float feet first, in a sitting position, when moving with a current.

TAKE CARE OF OTHERS

Stay connected to others if crossing floodwaters.
Take floatation for you and others

KNOW HOW TO GET HELP

Keep informed and adhere to warning and restrictions in place

Get ready for emergencies

- Understand your local hazards and risks
- Make plans for yourself, your household, whānau and friends
- Keep emergency supplies on hand
- Know where to go if you have to leave home
- Think about community resources and networks
